The application has been amended as follows:

Lines 2-7 of page 15 in specification "Additionally, although aspects of the present invention are described as being stored in memory, one skilled in the art will appreciate that these aspects can also be stored on other types of computer-readable media, such as secondary storage devices, like hard disks, floppy disks, or CD-ROM; a carrier wave from the Internet or other propagation medium; or other forms of RAM or ROM. The scope of the invention is defined by the claims and their equivalents" have been deleted.

### ***Allowable Subject Matter***

The Lines above implies the memory (medium) could be a carrier wave, propagation wave and internet in view of the computer program storage device claims.

2. The following is an examiner's statement of reasons for allowance:

LaPierre teaches a system and method for routing a call to an alternate destination associated with a subscriber of a universal number, Based upon the selection of the calling party. The subscriber may combine access to multiple residential and business telephone numbers via a single universal number. In response to a caller dialing the universal number, the controlling service control point determines whether the subscriber associated with the dialed number has signed up the universal number service. Upon that determination, the service control point instructs the calling party to select one of the alternate destinations associated with the subscriber. The list of alternate destinations may comprise pagers, cellular telephones, facsimile machines, secondary business or residential telephones, modems, and the like. In response to receiving the calling party's input, the service control point obtains the routing information associated with the chosen destination and instructs the controlling service switching point to route the call to the selected destination.

However, prior art of record fail to teach, or render obvious, alone or in combination, a method for routing a call directed to devices associated with one of a plurality of numbers, the plurality of numbers comprising a first number associated with a first service, and second number associated with first service and second service. The first service is ADSL service and the second service is ISDN service and wherein the type of the first service is one of residential and business ADSL service, and the type of the second service is one of residential and business ISDN service.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
